PROSPECTUS · BATCH OF 2027

Vedic Astrology
a nine-month certificate programme

Shri Vishwavijay Panchang is among the oldest and most respected Vedic almanacs in India, now in its 83rd year of continuous publication, and its Editors teach this course themselves. The nine months are built around one aim: **that you can read a person's chart, predict for them accurately, and give remedies they can actually carry out.**

DURATION	SESSIONS	MODE	BATCH
Nine months	Every Sunday	Live, with recordings	Deliberately small

Er. Shri Sudhakar Sharma Trivedi and Rohitashw Trivedi, teaching the correct recitation and process of mantra.

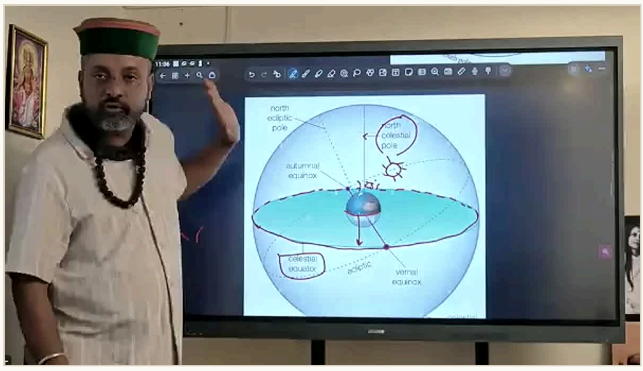

THE FOUNDATION OF THIS COURSE

The course is conducted in the Vedic tradition of **guru-śiṣya paramparā**: knowledge passed from teacher to student directly, in a small batch, as it has been carried in this family.

- **You learn the human being first.** Teachings of the Veda and the Upaniṣads, received through the guru-paramparā: the "I", consciousness, and the meaning of life, of birth and of death — all in the light of Vedic darśana, before any prediction is attempted.
- **Karma-siddhānta.** Why a birth takes place at all — sañcita and prārabdha karma, and what a life is carrying when it begins.
- **Pitṛ and ancestry.** What descends through a family line, and how it appears in the chart.
- **Three lenses on every connection.** Each of these is taught from the śāstric, the Vedic and the tāntric point of view.
- **The sky as it is seen from the Earth.** How the cosmos, the constellations and the planets actually appear to someone standing here — and the positional astronomy a student of Jyotiṣa needs, built from the beginning, with nothing assumed.
- **Sādhanā from the very first session.** Gāyatrī upāsanā, nyāsa, dhyāna, bhūta-śuddhi and other sādhanās, taught by the Editor himself.
- **The procedure, not only the prayer.** Śāstrīya vidhi for mantra anuṣṭhāna, tantra sādhanā and havan: how each is actually performed, including a havan done at home, step by step. These procedures are quietly disappearing; here they are taught in full.
- **Who the course is for.** No prior knowledge of astrology is expected; school arithmetic — multiplication, division, ratio and proportion — is enough. It is meant for those who worship Mā Gāyatrī as the Mother, and Brahmā, Viṣṇu and Maheśa as the supreme consciousness and divinity of the universe.
- **Knowledge that is first-hand.** Parts of what is taught here were never printed: a centuries-old tradition of the Trivedi family, carried by Pt. Hardev Sharma Trivedi, Er. Shri Sudhakar Sharma Trivedi and Rohitashw Trivedi.

HOW IT IS TAUGHT

- **One live session a week**, every Sunday.
- **Every session is recorded.** The live classes and their recordings are placed on the student portal, so a missed lecture can be watched later, or gone through again for revision.
- **Students bring their own charts**, and the class works on live examples. Real cases are analysed in session.
- **Assignments are set each week** and submitted.
- **One personal session every month** with the teacher, for each student, to clear doubts.
- **A complimentary astrological consultation** by Rohitashw Trivedi for every student.
- **Visit us in person.** Students may come to Joytish Academy at Solan, Himachal Pradesh, at a mutually convenient time, to meet the teachers and clear doubts.
- **No prior knowledge of astrology is required. High-school arithmetic is enough.**
